Puppy Care Facts

- The perfect age for Spay/Neuter & Rabies is 4 months old.
- Any needed boosters can be added to the spay/neuter process.
- Puppies need heartworm preventative from first visit, but no test until 12 months.

Kitten Care Facts

- The perfect age for Spay/Neuter & Rabies is 4 months old.
- Any needed boosters can be added to the spay/neuter process.
- FelV/FIV Test is available but is not totally accurate until kitten is 3-4 months old.

New Pet Checklist

- Puppies & Kittens should get regular boosters every 3-4 weeks starting at 8 weeks old and get at least 2 rounds of shots to be totally protected.
- Before their first parvo shot, limit your puppy's exposure *no dog parks, public areas.*
- Heartworm preventative should start at 8 weeks.
- At 16 weeks, schedule spay/neuter and final boosters.
